

CLEAN AIR – HIGH EFFICIENCY AIR CIRCULATION UNIT

- 99.99% Efficiency @ 0.3 Microns
- 24" X 12" Hepa Filter
- Pre-Filter (To Extend Hepa Filter Life)
- Ultraviolet-C Light
- Top Air Distribution Head
- 3" Casters
- Unit Operates Under 50db
- On I Off Switch
- Dirty Filter Indicator (Light)
- 6' - 120v Power Cord
- 500 & 1000 CFM Units Available
- QPS Approval
- Ionizer
- Clock – Timer c/w Auto Restart

RERVHC ENERGY RECOVERY VENTILATOR WITH INTEGRATED HEATING & COOLING 250 – 20,000 CFM

Superior performance with modulating cooling and heating options

- Molecular Sieve Desiccant with purge for superior performance
- D/X, Chilled Water, Heat Pump, Dehumidification
- Natural Gas, Hot Water, Electric, Hot Gas re heat

PACKAGED ROTARY ENERGY RECOVERY VENTILATORS 250 – 20,000 CFM

- Molecular Sieve Desiccant with purge for superior performance
- Extended cabinets with coils
- Natural Gas, Hot Water, Electric re heat

LOW PROFILE INDOOR ROTARY ENERGY RECOVERY VENTILATORS 500 – 3300 CFM

- Molecular Sieve Desiccant with purge for superior performance
- Horizontal ceiling mount

ROOFTOP MULTIZONE UNITS 16 TO 43 TON CAPACITIES (410A)

Superior performance with modulating cooling and heating options

- Direct fit of existing units
- Custom sizes available

CUSTOM AIR HANDLING SYSTEMS

- Units designed to meet specification requirements
- Outdoor or Indoor applications
- D/X, Chilled Water, Heat Pump
- Natural Gas, Hot Water, Hot Gas Re heat
- Dehumidification systems also available

SPOAU DEDICATED 100% OUTDOOR AIR UNITS

Superior performance with modulating cooling and heating options

- 100% Outdoor Air Applications
- D/X, Chilled Water, Heat Pump, Dehumidification
- Natural Gas, Hot Water, Hot Gas Re heat
- Package or split systems (Indoor or outdoor roof mounted)

VERTICAL & HORIZONTAL SPLIT-ABLE AIR COOLED AIR CONDITIONERS (410A)

- 3 to 25 Ton Capacities – Vertical Units
- 2 to 15 Ton Capacities – Horizontal Units
- Commercial new construction or renovations

SCREENING SYSTEMS FOR ROOFTOP PACKAGED UNITS

- Easily installs directly to unit with no roof penetrations
- Sliding panels provide all necessary access as required
- Available in cladding or punched louvered styles
- Powder coated paint finish to match any colour
- Rated up to 255 MPH
- Stand alone systems are also available

HARSH ENVIRONMENT AIR COOLED PACKAGE UNITS (410A)

- Designed for outdoor or indoor corrosive environment applications. Constructed of high-grade 18 gauge type 304 stainless steel, they combine high-efficiency state-of-the-art design and performance.

VERTICAL & HORIZONTAL WATER SOURCE HEAT PUMPS AND AIR CONDITIONERS

- SW Series 3/4 to 10 Ton Capacities (410A) Rotary & Scroll Compressors
- EW Series 3/4 to 5 Ton Capacities (410A) Rotary & Reciprocating Compressors New construction or renovations

VERTICAL WATER COOLED AIR CONDITIONERS 5 TO 60 TON CAPACITIES (410A)

Commercial new construction or renovations

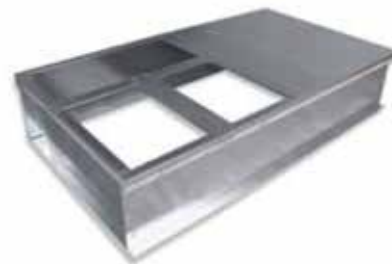

AR SERIES AIR ROTATION SYSTEMS

- Superior performance with modulating cooling and heating options
- All systems are engineered to meet your specific needs
- Indoor or outdoor applications
- Natural Gas, Hot Water, Electric or Steam heating (available)
- D/X or chilled water coils (available)
- Pleated filter section available (MERV 13 is standard)
- Economizer / mixing box with dampers, actuators and controls (available)
- Drum louver discharge head is standard (for maximum air circulation and coverage)

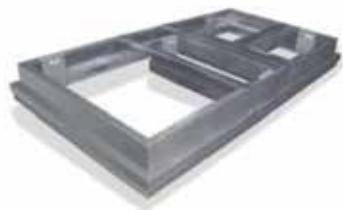

RENTAL / SPECIAL EVENT AIR CONDITIONING UNITS (410A)

- Packaged air and water cooled air conditioning systems in a variety of units ranging from 2 to 25 Tons. Our variety of applications can be from cooling a tent to temporary replacement while new equipment is installed. Systems have been used for events such as F1, NASCAR, and the Canadian Open (golf & tennis) championships.

KNOCKDOWN ROOF CURBS "CLIPLOCK"

- Patented design assembles in less than 5 minutes without the use of tools
- 8", 14", 18, 24" are standard. Custom heights available
- Seismically rated versions are available

ISOLATION HEAD ASSEMBLIES 1" AND 2" DEFLECTION

- Ships fully assembled and has internal flex duct connectors
- Seismically rated versions are available

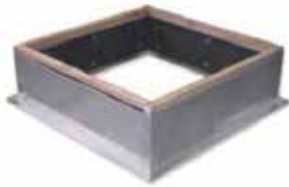

ROOF CURB ADAPTERS QUICK SHIP PROGRAM

Manufactured to suit any unit combinations

PLENUM CURBS

Ships fully assembled, includes internal insulation - full floor - internal transitioning

WELDED INSULATED CURBS

Ships fully assembled, includes internal insulation. Canted version also available

MODULATING ECONOMIZERS

Available in down flow or horizontal configuration. Equipped with a solid state control package and reliable gear driven dampers

CENTRIFUGAL POWER EXHAUST

Available in down flow or horizontal configuration. Equipped with a DWDI blower-TEFC high efficiency motor-adjustable V belt drive. Optional VFD available

SUPPLY AIR DIFFUSERS

Available 1 to 6 sided distribution with adjustable Drum Louvers Capacities ranges from 2- 30 Tons

COMBINATION STEP DOWN SUPPLY / RETURN DIFFUSERS

- 4 sided distribution with double deflection supply grilles - egg crate return grille - internally insulated cabinet - white enamel finish
- Capacities ranges from 2- 30 Tons

COMBINATION FLUSH MOUNT SUPPLY / RETURN DIFFUSERS

- 4 sided fixed distribution - egg crate return grille - internally insulated cabinet
- white enamel finish
- Capacities ranges from 2- 30 Tons

ZONE DAMPERS - ROUND / SQUARE AND RECTANGULAR

Actuator mounting bracket and drive shaft are standard

WALL BRACKETS - STEEL OR ALUMINUM CONSTRUCTION

Ideal for mounting outdoor equipment and condensing units

FILTER RACKS AND CABINETS

Available in a variety of sizes with or without filter

ENCLOSURES FOR FAN COIL OR INDUCTION UNITS

Custom designed and manufactured to suit specification requirements
